

1. Grade Checker

Take a score as input and print the grade based on the following:

90+ : "A"

80-89 : "B"

70-79 : "C"

60-69 : "D"

Below 60 : "F"

here we used a basic if else statement to carry out marks and all.

2 Student Grades

Create a dictionary where the keys are student names and the values are their grades.

Allow the user to:

Add a new student and grade.

Update an existing student's grade.

Print all student grades.

Used dictionary and basic operations. Using if else:

3. Write to a File

Write a program to create a text file and write some content to it.

Using file functions like write and open.

4. Read from a File

We used open in read mode and file.read to read and print to display.

Submission Guidelines -: Attach Screenshots or command along with explanation and submit in doc(google doc or microsoft doc) format or share github link
